출판사 소개

Association for Computing Machinery (ACM)

- 1947년 설립된 Association for Computing Machinery (<http://www.acm.org>)는 컴퓨터 및 IT 관련 모든 분야에 대한 최신 정보를 제공하는 협회로서, 현재 전 세계 80,000여 명 이상의 회원을 보유
- ACM 회원들은 단순히 기술보고서나 논문을 게재하는 활동 이외에도, 연구 시 발생 되었던 문제들과 해결 방법, 그리고 수록된 기술 보고서나 논문에 대한 Review를 제시함으로써 컴퓨터 관련 분야의 가장 권위 있는 Community를 형성하고 있음

수록내용

1. 주제분야 : 컴퓨터 공학분야

2. 수록내용 :

* The ACM Digital Library

컴퓨터 공학 분야의 Journal, Magazine, Transaction, Conference Proceeding, Publications by Affiliated Organizations, Book, Technical Reports 및 Newsletters의 원문(PDF형식) 및 논문의 서지 정보 제공

- 1950년부터 현재까지
- 1,900,000여건의 서지 Records
- 매년 2만 5천 여건의 Records update
- Audio, Video, Animation을 포함한 800개 이상의 multi-media 파일

CSUR [ACM Computing Surveys \(CSUR\)](#)

These comprehensive, readable tutorials and survey papers give guided tours through the literature and explain topics to those who seek to learn the basics of areas outside their specialties. The carefully planned and presented introductions in [Computing Surveys \(CSUR\)](#) are also an excellent way for professionals to develop perspectives on, and identify trends in complex technologies. Recent issues have covered image understanding, software reusability, and object and relational database topics.

ACM Magazines

Search within the ACM Magazines:

CACM [Communications of the ACM](#)

ACM's flagship magazine, *Communications of the ACM*, is the premier chronicler of computing technologies, covering the latest discoveries, innovations, and research that inspire and influence the field. Each month, *Communications* brings readers in-depth stories of emerging areas of computer science, new trends in IT, and practical research applications. Industry leaders choose *Communications* to debate technology implications, public policies, engineering challenges, and market trends.

Read by over 85,000 computing researchers and practitioners worldwide, *Communications* is recognized as the most trusted and knowledgeable source of industry information for today's computing professional.

CIE [Computers in Entertainment \(CIE\)](#)

Computers in Entertainment (CIE) is an online-only magazine about a wide range of theoretical and practical computer applications in the entertainment industry, including engagement, playfulness, creative technique, business, pleurability, and "funology." CIE publishes peer-reviewed research papers and articles, as well as commentaries, opinion articles, video interviews as well as their transcriptions, creative content such as games and artwork, and more.

Editor-in-chief Newton Lee, the founder of CIE, oversees the publication. Unsolicited article submissions are welcomed and can be uploaded online at <http://mc.manuscriptcentral.com/cie>.

[eLearn](#)

eLearn magazine is published by ACM, a not-for-profit educational association serving those who work, teach, and learn in the various computing-related fields. Founded in 1947 as the Association for Computing Machinery, ACM's stated mission is to advance the arts, sciences, and applications of information technology. It is the oldest and most respected organization of its kind.

eLearn is ACM's first Web-only publication. It will build on ACM's reputation by serving as the most accurate and unbiased source for news, information, and opinion on the now-flourishing field of online education and training. It also offers a community hub for e-learning professionals on the Web, providing a wealth of public forums for the free exchange of ideas.

The Autonomous Agents and MultiAgent Systems (AAMAS) conference series brings together researchers from around the world to share the latest advances in the field. It provides a high-profile and high-quality forum for research in the theory and practice of autonomous agents and multiagent systems. AAMAS 2002, the first of the series, was held in Bologna, followed by Melbourne (2003), New York (2004), Utrecht (2005), Hakodate (2006), Honolulu (2007), Estoril (2008), Budapest (2009), Toronto (2010), Taipei (2011), Valencia (2012), and Saint Paul (2013). This volume constitutes the proceedings of AAMAS 2014, the thirteenth conference in the series, held in Paris in May 2014.

ACM Special Interest Groups

SIGACCESS [Special Interest Group on Accessibility and Computing](#)

The ACM Special Interest Group on Accessible Computing promotes the professional interests of computing personnel with disabilities and the application of computing and information technology in solving relevant disability problems. The SIG also strives to educate the public to support careers for people with disabilities.

SIGACT [Special Interest Group on Algorithms & Computation Theory](#)

The ACM Special Interest Group on Algorithms and Computation Theory is an international organization that fosters and promotes the discovery and dissemination of high quality research in theoretical computer science (TCS), the formal analysis of efficient computation and computational processes. SIGACT, through its awards program, recognizes individuals who have made significant contributions to the field in research and service. TCS covers a wide variety of topics including algorithms, data structures, computational complexity, parallel and distributed computation, probabilistic computation, quantum computation, automata theory, information theory, cryptography, program semantics and verification, machine learning, computational biology, computational economics, computational geometry, and computational number theory and algebra. Work in this field is often distinguished by its emphasis on mathematical technique and rigor.

SIGAda [Special Interest Group on Ada Programming Language](#)

The ACM Special Interest Group on Ada Programming Language provides a forum on all aspects of the Ada language and technologies, including usage, education, standardization, design methods, and compiler implementation. SIGAda's annual conference addresses Ada's role in building industrial-strength applications that support mission-critical, safety-critical, real-time, distributed, high-assurance, and high-integrity requirements. Supporting technologies that SIGAda focuses on include software engineering, software development processes, object technology, computer science education, tools, Common Object Request Broker Architecture (CORBA), and Java.
