The majestic blue whale, the goliath of the sea, certainly stands alone within the animal kingdom for its adaptations beyond its massive size. At 30 metres (98 ft) in length and 190 tonnes (210 short tons) or more in weight, it is the largest existing animal and the heaviest that has ever existed. Despite their incredible strength, aggressive hunting in the 1900s by whalers seeking whale oil drove them to the brink of extinction. But there are other reasons for why they are now so endangered.

The blue whale's common name derives from bluish-hue that covers the upper side of its body, while its Latin designation is *Balaenoptera musculus*. The blue whale belongs to the Mysticeti suborder of cetaceans, also known as baleen whales, which means they have fringed plates of fingernail-like material, called baleen, attached to their upper jaws. Blue whales feed almost exclusively on krill, though they also take small numbers of copepods. An adult blue whale can eat up to 40 million krill in a day.

These gargantuan beasts used to dominate all the oceans of the Earth up until the late nineteenth century, when the technology was developed to effectively hunt and harvest them. In 1864, the Norwegian Svend Foyn equipped a steamboat with harpoons specifically designed for catching large whales. This led to the killing of hundreds of thousands of whales up until 1966, when the International Whaling Commission banned the practice.

The blue whale certainly appears grand in size and beauty, but the sounds it produces and how it communicates are also sublime. Amazingly, their vocalizations can reach 155 and 188 decibels.

The blue whale (*Balaenoptera musculus*) is a marine mammal belonging to the baleen whales (Mysticeti). [3] At 30 metres (98 ft) [4] in length and 190 tonnes (210 short tons) [5] or more in weight, it is the largest existing animal and the heaviest that ever existed. [6] Long and slender, the blue whale's body can be various shades of bluish-grey dorsally and somewhat lighter underneath. [7] There are at least three distinct subspecies: *B. m. musculus* of the North Atlantic and North Pacific, *B. m. intermedia* of the Southern Ocean and *B. m. brevicauda* (also known as the pygmy blue whale) found in the Indian Ocean and South Pacific Ocean. *B. m. indica*, found in the Indian Ocean, may be another subspecies. As with other baleen whales, its diet consists almost exclusively of small crustaceans known as krill. [8] Blue whales were abundant in nearly all the oceans on Earth until the beginning of the twentieth century. For over a century, they were hunted almost to extinction by whalers until protected by the international community in 1966. A 2002 report estimated there were 5,000 to 12,000 blue whales worldwide, [9] located in at least five groups. More recent research into the Pygmy subspecies suggests this may be an underestimate. [10] Before whaling, the largest population was in the Antarctic, numbering approximately 239,000 (range 202,000 to 311,000). [11] There remain only much smaller groups of 2 nm.

Benefits of High School Sports
Article Error

High school sports are an integral part of youth participating in any school year. More than ever before, sports are an important part of a student's life. Playing sports can have a great effect on a student's positive social interaction.

Most importantly, those who are active in sports are more likely to reach these goals because sports help them achieve their goals. According to the video "How Sports Affect Students," those students who played sports had higher academic achievement than those students who played sports were not active.

Next, students who play sports have higher self-esteem. This is illustrated by Daniel Gou's video "How Sports Affect Students." He has shown that children who participate in sports have higher self-esteem, ties to school and increased occupational aspirations in youth. This demonstrates that playing sports inspires students to think about their future. Playing sports proves to be helpful as it stimulates the brain; this allows students to consider their future careers and aspirations. Many students do not think ahead in the future, but those who play sports have shown to have more ambition and drive to succeed in the future.

In the CBS News video, Katie Couric reports that University of Alberta states "playing sports not only gives kids confidence, but it can give them more reward than other activities." Because playing sports requires team work and dedication, this transfers into student's lives outside of sports. Students do not have to play traditional team sports to be social. An Article Error sport encourages interaction and social skills. Students who did not play sports often suffer from low social interaction; social interaction proves to be more helpful than harmful to students, so playing a sport could increase that.

The opponent might argue that playing sports can be very dangerous. While sports can be dangerous, injuries are always possible not only from sports but everyday things such as driving and you get in a car crash, going down the stairs and falling, tripping over a rock and scraping your knee, etc. The positives outweigh the negatives when it comes to playing sports. • 疑难解答

- 问：相似度达到百分之几以上视为抄袭？
- 答：关于‘抄袭’的问题,没有绝对的标准. 相似度高,我们可以怀疑该文稿是‘抄袭’,但与此相反,如果您在文稿上试图过‘无表示引用来源’的话, 相似度低也可以视为‘抄袭’. 因此,你拿到‘相似度低’的结果,也建议尽量再次确认在原文上打勾的部分进行修改.
- 问：在turnitin上没查出‘抄袭’的内容的话,可以放心吗？
- 答：‘turnitin’是按照使用者提交的文稿来分析相似度的一种电脑软件,不是判断与否抄袭的. 而且不能跟全世界的数据进行比较,也许存在得不出相似度的可能性. 虽然现在没发现抄袭的部分,但以后会发生抄袭的问题. 所以, 我们建议尽量您与更多的同事研究者再次确认以及进行检讨.
