❖ AIP (American Institute of Physics)

AIP | American Institute of Physics

American Institute of Physics는 Member Societies에서 제공하는 General Physics, Applied Physics, Chemical Physics, Medical Physics, Astronomy, Electronics, Materials Science 등 물리학 관련 출판물을 출간하고 대행하는 학회입니다.

URL : <http://www.aip.org>

❖ AIP Publishing

AIP Publishing은 세계적인 물리학 공동체의 높은 인용을 자랑하는 과학정보를 제공합니다. AIP Publishing의 포트폴리오에는 Applied Physics Letters, Applied Physics, Chemical Physics 및 AIP Conference Proceedings 시리즈와 같은 권위 있는 타이틀이 포함되어 있습니다.

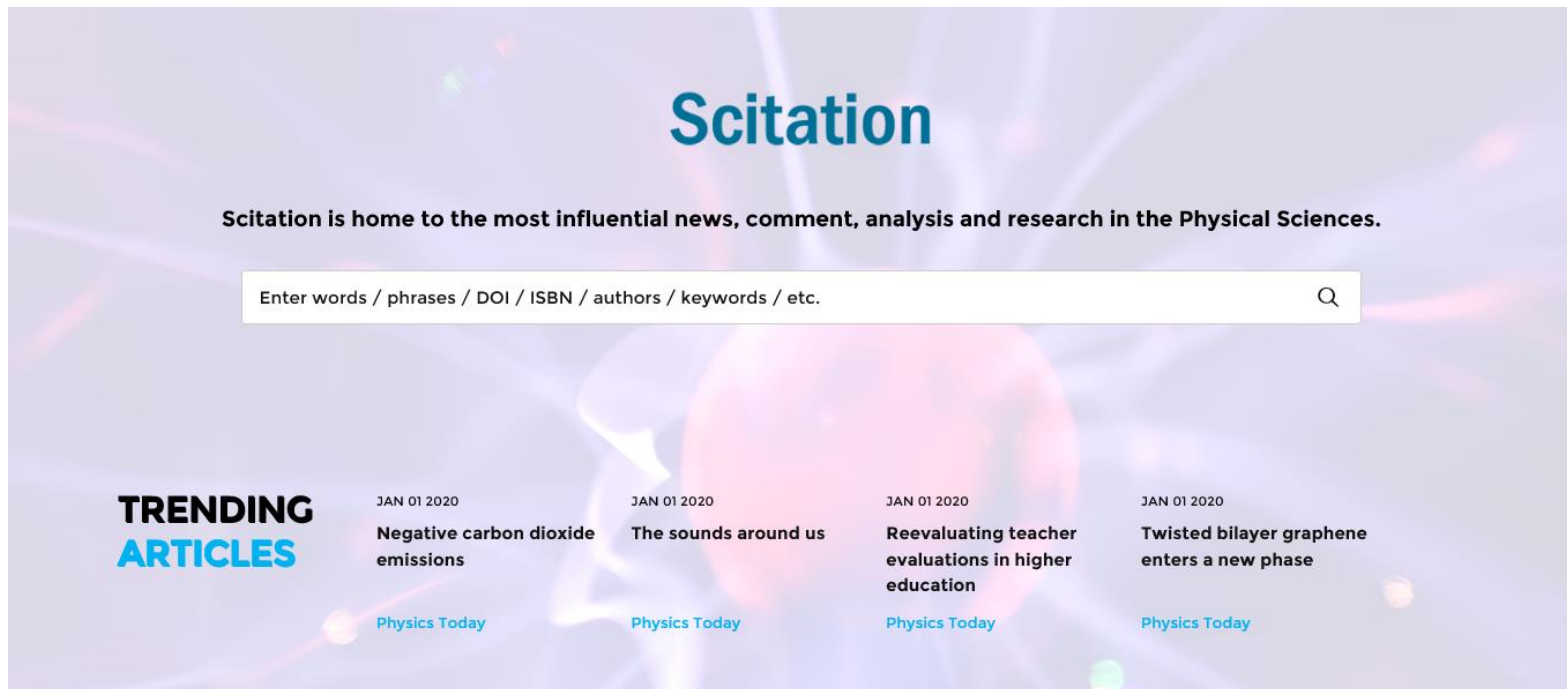

URL : <http://publishing.aip.org>

❖ Scitation

Scitation

AIP 및 Member Societies에서 제공하는 저널 검색 Portal Site로, 원문 검색 시 저널 명, 출판사, Keyword, DOI 등의 정보를 이용하여 원하는 Article을 검색하실 수 있습니다.

URL: <http://www.scitation.org>

Focus and Coverage

Applied Physics Letters (APL) features concise, up-to-date reports on significant new findings in applied physics. Emphasizing rapid dissemination of key data and new physical insights, APL offers prompt publication of new experimental and theoretical papers reporting applications of physics phenomena to all branches of science, engineering, and modern technology.

INFO

- 저널 특징, Coverage, JCR 및 Impact Factor 지수, ISSN 등 저널 정보 확인 가능
- 편집 정책 및 연락처 등 확인 가능

Journal also publishes invited Fast Track, Perspectives, and in-depth review articles in applied physics.

Journal also publishes invited letters which highlight recent developments or discoveries. Perspectives are characterized by personal viewpoints and opinions.

Fast Track articles are invited original research articles that report results that are particularly novel and important or provide a significant advancement in an emerging field. Because of the urgency and scientific importance of the work, the peer review process is accelerated. If, during the review process, it becomes apparent that the paper does not meet the Fast Track criterion, it is returned to a normal track.

Topics covered in APL are diverse and reflect the most important subjects in applied physics, including:

- Photonics and optoelectronics
- Surfaces and interfaces
- Advanced materials
- Semiconductors

ABSTRACT

We investigate the magnetic field dependence of the spin excitation spectrum of the noncollinear spin system that forms periodically over a macroscopic length scale. Following the field initialization of the CSL, we found three collective resonance modes over an exceptionally wide frequency range. Upon further reducing the magnetic field toward 0 T, the spectral weight of these collective modes was disrupted by the emergence of additional resonances whose Kittel-like field dependence
